GOWDA JEEVITH KARIYAPPA

Bengaluru, Karnataka, India | +91 80507 87037 | gowdajeevith72@gmail.com | LinkedIn | GitHub

SUMMARY

Final-year B.Tech student in Computer Science & Engineering (Data Science) with a CGPA of 8.62/10, working mainly in Python on machine learning and LLM applications. Co-built a fraud-detection system on 3.03M transactions and an offline AI assistant. Applying for IBM's Software Innovation Lab Intern (AI & Data) role.

EDUCATION

Presidency University, Bengaluru 2023 – 2027

B.Tech, Computer Science & Engineering (Data Science) | **CGPA: 8.62/10**

Relevant coursework: Machine Learning, Deep Learning, Generative AI, Data Mining, DSA, DBMS, Operating Systems

Indraprastha Pre-University College, Uppinangady, Karnataka Class XII (PCMC): 90.16%

Navodaya English High School & Junior College, Thane, Maharashtra Class X: 85.80%

TECHNICAL SKILLS

Programming Languages	Python, SQL, Java, C++, JavaScript
AI & Machine Learning	Scikit-learn, TensorFlow, Random Forest, Neural Networks, Explainable AI (SHAP)
LLMs & Generative AI	Ollama (Llama, Mistral), Prompt Engineering
Data & Databases	Pandas, NumPy, Matplotlib, NetworkX, MySQL, Feature Engineering
Tools & Frameworks	Git, GitHub, VS Code, Jupyter Notebook, Flask, Streamlit
Core CS	Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems
Cloud & Learning	OCI AI Foundations (Certified); Learning Agentic AI, Apache Spark, GCP

PROJECTS

FINsleuth: Financial Crime Detection Using Graph Analytics *Python, Scikit-learn, NetworkX, SHAP*

- Built, with a team, a tool that flags suspicious accounts using **3.03M transactions across 47,526 accounts**.
- Designed **21 behavioral features** for a Random Forest risk score and ran **3 graph algorithms** (PageRank, degree centrality, and betweenness centrality) on the transaction network to spot suspicious patterns.
- Kept the machine learning score and the graph evidence as two independent layers, so each flag can be checked in two ways. Added SHAP explanations, multi-hop fund-flow tracing, and a time-based evaluation that avoids leakage.

LUNA: Offline AI Assistant *Python, Flask, Ollama, JavaScript*

- Built, with a team, an AI chat assistant that runs **2 open-source LLMs** (Llama and Mistral) locally through Ollama, with **no cloud API calls**, so conversations stay on the user's machine.
- Wrote the Flask backend for chat routes and API requests, and tuned prompts so replies sound calm and natural.

Gold Price Prediction Using Machine Learning and Deep Learning *Python, TensorFlow, Scikit-learn*

- Built a notebook that predicts the next trading day's gold close from Yahoo Finance data and compares classical machine learning, ARIMA, LSTM, and GRU models against a naive baseline.
- Split data in time order (**70/15/15**) so models never see the future; scored on **4 metrics**: MAE, RMSE, R^2, MAPE.

EXPERIENCE

AI & Prompt Engineering Intern, VaultofCodes (Remote) Aug 2025 – Oct 2025

- Wrote and tested LLM prompts, revising them until the responses were more relevant and consistent.
- Used structured prompting techniques to make AI-powered workflows more reliable.

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) 2025 AI Foundations Associate Nov 2025 (valid through Nov 2027)

Machine Learning with Python, YHills 2023 – 24

LANGUAGES

English, Hindi, Kannada, Marathi, Tulu
